

# ACRI-FLAT®

Exterior Wood & Masonry Flat Paint

## OUTSTANDING WATER REPELLENCY

**ACRI-FLAT®** is a quality acrylic flat paint with outstanding water repellency, superior efflorescence resistance and excellent color retention for long-term exterior durability. **ACRI-FLAT®** is easy to apply and provides a “dead flat” finish, which helps minimize surface imperfections. It is extremely versatile and ideally suited for protecting all properly prepared and primed exterior surfaces. It’s also designed as a self-priming solid color stain for new rough-sawn wood surfaces.

### HOW ACRI-FLAT REPELS WATER

Acri-Flat's unique resin particles create a tight paint film that does not allow water to collect and seep into the surface. As a result, Acri-Flat forces water to bead and run off the surface.

#### HERE'S HOW WE TEST THE WATER REPELLENCY OF ACRI-FLAT:

- Step 1:** Acri-Flat is applied on white charts.
- Step 2:** After allowing the paint to dry for 24 hours, five drops of water are then placed on the paint.
- Step 3:** After 30 minutes, the panels are evaluated to see if the water remains beaded or has seeped into the surface.

These are digital photographs of actual test results. The actual test results may be viewed by appointment at Dunn-Edwards' corporate office.

#### PRODUCT BENEFITS

- ▶ Outstanding water repellency that minimizes surface damage caused by moisture
- ▶ Superior efflorescence (mineral deposits) resistance for better paint adhesion and a more attractive finished appearance
- ▶ Excellent color retention to keep the original color longer
- ▶ Very good crack resistance means the painted surface looks newer longer
- ▶ "Dead flat" finish to hide minor surface imperfections
- ▶ Easy to apply, making it more convenient and easier to use
