

How to choose a Painting Contractor

HOW TO CHOOSE A PAINTING CONTRACTOR

Painting is a skill that requires considerable expertise and experience. To achieve the best results on your home, it's important to choose a reputable painting contractor – someone familiar with the best products needed for your home and with the appropriate tools to do the job right. Here are some tips to help you hire the right contractor.

Why hire a reputable painting contractor?

Many of the tasks involved in preparation and painting, such as working on ladders and using solvents and other chemicals, can be hazardous. When preparing a previously painted surface, these materials can cause serious health problems. Experienced painters understand the appropriate steps needed to avoid these hazards, including how to properly prepare surfaces.

Experts are also familiar with the appropriate paints and tools, as well as how to use them effectively to ensure a quality finish. Reputable painters will also know how to handle and properly dispose of all water and solvent-based waste and how to clean up after a paint job.

Tips for choosing the right painting contractor

Specify the Work

With each painter, make sure you receive quotes for the same work. Prepare a list of what needs to be done and be sure to include what paint color and gloss level you would like, along with your preferred paint product. Provide a completion date.

Check References

A qualified painter will provide at least three references. The work completed for each referral project should be similar in size and scope to yours, and some should only be a few years old to demonstrate labor and product performance.

If possible, ask to see some finished projects to verify the results. Ask each referral the following questions:

- :: Was the job completed on time?
- :: Were you satisfied with the results?
- :: Did the quote match the final cost?
- :: Was the painter's work disruptive?
- :: Would you hire the painter again?

Once you have three qualified painters, invite them to visit your home and provide a quote.

Get Quotes

For each quote received, make sure the following details are in writing:

- :: Painter's contact information
- :: Your contact information
- :: Specification of the exact work to be done, including all areas to be prepared and painted
- :: Paint products and colors to be used, including brand names
- :: Completion date
- :: Total cost

Each quote should be signed and dated by the painter. When comparing quotes, ask for a breakdown of material and labor costs so you can make a fair comparison.

Pay attention to presentation

As with most hiring processes, pay attention to each painter's presentation. Are they polite, professional and dressed appropriately? Their presentation will most likely reflect the type of work they do.

Ask about insurance

Ask to see a certificate of insurance. Painting can be hazardous work. It's important to hire an insured painter so you are not held responsible for any injuries to the painter or crew members.

Check licensing

Contractor licensing laws and regulations vary in each state. Check your state government's website for more information on laws in your area.

Get it in writing

Written contracts are a must! Both you and your painter should sign a written contract that specifies the project's scope. This should include details on surface preparation such as specifying exactly how your property will be protected. It should also include how surfaces will be painted, the exact paint products to be applied, a time schedule and payment terms.

Payment tips

- :: Don't pay cash
- :: Don't pay more than 10% upfront or \$1,000, whichever is less
- :: Keep all payment records
- :: Only make your final payment once you are completely satisfied with the job

A word about paint quality

There are numerous choices when it comes to paint, but not all paints are created equal. A premium paint offers a smoother, more uniform appearance, as well as better coverage than an economy paint. Although a premium paint may cost more, it maintains its durability longer so your home doesn't require frequent repainting.

Make sure you know exactly what type and brand of paint is specified in the contract and make certain those products are actually used.

Please note that these suggestions are provided as a service to you. We are unable to guarantee or be responsible for the results obtained by these procedures. If you have additional questions, please contact or visit a Dunn-Edwards store.

A GREEN LEGACY, A GREENER FUTURE.

Dunn-Edwards has a green legacy that makes us proud and inspires us to do more. We are firmly dedicated to the principle of eco-efficiency, which we define as the ability to satisfy human needs in ways that minimize adverse impacts on energy and material resources, environmental quality, and human health and safety.

HEALTH & SAFETY when using water-based paints: **CAUTION! INHALATION OF SPRAY MIST OR SANDING DUST MAY BE HARMFUL.** Use only with adequate ventilation. Avoid breathing vapors, spray mist and sanding dust. Wear NIOSH approved N95 particulate filter mask when spraying or sanding. Avoid contact with skin and eyes. Do not ingest. Close container after each use. **FIRST AID:** If swallowed, immediately give 1 or 2 glasses of water to drink – for emergency information, call 1-800-222-1222. If having difficulty breathing, move to fresh air. For eye contact, immediately flush with water for 15 minutes. For skin contact, wash thoroughly with soap and water. **KEEP OUT OF REACH OF CHILDREN.** For more information, see the appropriate Product Data Sheet(s) and Safety Data Sheet(s) available at dunnedwards.com.

CAUTION! Scraping or sanding surfaces of older buildings (especially pre-1978) may release dust containing lead or asbestos. **EXPOSURE TO LEAD OR ASBESTOS CAN BE VERY HAZARDOUS TO YOUR HEALTH.** Wear a NIOSH-approved N100 particulate filter mask to avoid breathing dust. Use a HEPA vacuum for cleanup, and finish by water-washing all surfaces. For more information, see Dunn-Edwards brochure on "Surface Preparation Safety" or call U.S. EPA's lead hotline at 1-800-424-LEAD, or visit "<http://www.epa.gov/lead>" www.epa.gov/lead or /asbestos, or contact your state or local Health Agency.
